

Technical Assistance to Develop the Energy Africa Compact

Client:

Development Alternatives Incorporated (DAI)

Location:

Kenya, Ethiopia, and Somalia

Start Date:

February 2016

Completion Date:

October 2016

Key Services:

- Creation of Energy Africa Compacts

In 2016, ASD was hired by DAI to develop the energy Africa Compacts for Kenya, Ethiopia and Somalia. These Energy Compacts were developed between DfID and the governments of Kenya, Ethiopia and Somalia respectively.

OVERVIEW

To create Energy Africa Compacts, ASD conducted the necessary research to create these documents in close consultation with the Ministries and other energy sector stakeholders in each country. The focus was on the priority policy actions governments can take to stimulate the household solar market. The document included an analysis of regulatory priorities, detailed action plans and an outline of actors. In the Compact, ASD also identified donor support, current and future, and areas where support may be important going forward.
